

# CLEAN CARS FOR YOU AND YOUR TRIBE

**YOU MIGHT QUALIFY  
FOR A STATE-FUNDED  
INCENTIVE TO HELP  
YOU BUY OR LEASE  
A CLEAN AIR VEHICLE!**

Let's build a just and healthy future for the next generation and for our communities today. Transportation is the largest contributor to greenhouse gas emissions. The state is offering incentives for electric vehicles (EVs) that are clean, safe, affordable alternatives to gas-powered cars.

## WHY EVS?

EVs benefit the community by providing:

### Healthier air

Cleaner air means higher birth weight, fewer sick days, and less asthma.

### Financial savings

On average, fueling a car with electricity is the same as paying \$1 per gallon of gas.\*

### Protection of the environment

EVs combat climate change, replacing dirty cars and reducing greenhouse gas emissions.

### Support for local economies

Renewable energy incentives are supporting economic growth throughout the state.

## YOU CAN AFFORD IT!

California has a goal of 5 million clean cars on our roads by 2030 and for 100 percent zero-carbon electricity by 2045, and there's money available to help you get a cleaner car. These incentives can help you purchase, lease, and replace an older, polluting vehicle.
